

We want to broaden the transparency agenda, including:

- The publication of environment related actions and expenditures made by extractive companies.
- The publication of social expenditures made by extractive companies.

RLIE MEMBER ORGANIZATIONS

With the support of:

**We demand
from EITI the
maximum possible
transparency**

We defend the EITI Standard:

- Information about payments made by companies must be completely disaggregated for publication.
- Information about contracts and real beneficial owners should be published.
- A demanding validation process to reach the certification as a Compliant Country should be maintained.

We want to deepen transparency regarding payments by extractive companies:

- We want to know why companies pay what they pay.
- We want to know about transfer pricing and who owns the intermediary trading companies.
- We want companies to publish their production costs.
